EXOTIC PLANTS

Our exotic plants make it possible to create a “Mediterranean” garden in any latitude. These are available in multiple varieties and sizes.

We carefully select each exotic plant for its resilience and adaptability to various climates, ensuring that it thrives and grows lushly.

Whether for large gardens, panoramic terraces, or small green corners, exotic plants transform any space into an oasis of biodiversity and beauty.

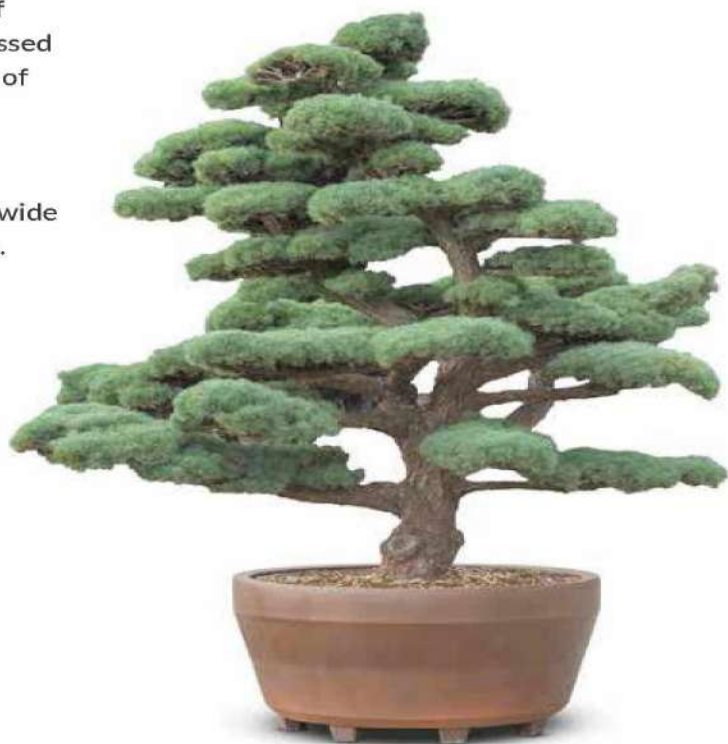

i&M BONSAI

Our exclusive collection of macrobonsai, of Japanese origin, is a tribute to their centuries-old traditions. A heritage of techniques and wisdom passed down through generations of master bonsai artists.

Each bonsai is a living masterpiece, available in a wide range of varieties and sizes.

I&M LARGE SPECIMENS

We offer large specimens, ideal for the immediate realization of parks and gardens.

Selected for their resilience and adaptability, these mature trees provide instant visual impact and character to parks, gardens, and urban landscapes.

*With young plants, we project parks and green areas into the future.
With large specimens, we gift their history and our time.*

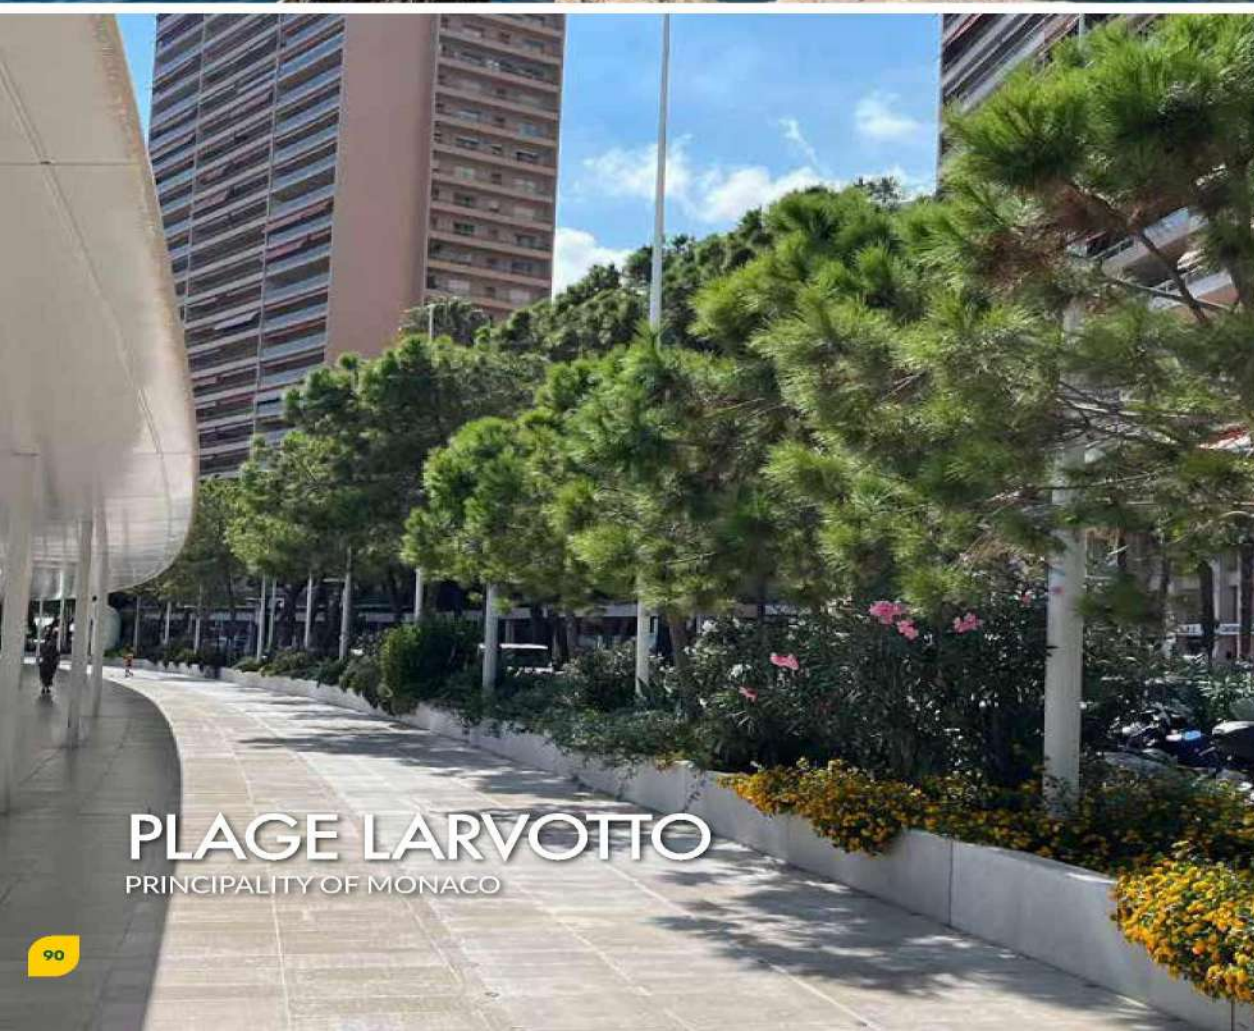

I&M MAKING LANDSCAPE

Our plants around the world are the protagonists of landscape works thanks to their ability to enhance the architectural choices of landscape designers and green professionals.
